### Why is asbestos dangerous?

The organizations listed below can provide more information about asbestos exposure. Virtually all cases of mesothelioma are linked with asbestos exposure. If you have asbestos containing materials that could be impacted during the work, hire a certified asbestos contractor to abate the asbestos.

### What Is Asbestos?

If you choose to remove asbestos from your home yourself, you should consult how-to guides there are some provided on the next page , books and government agencies dealing with asbestos and its removal. Can I paint or encapsulate the asbestos myself? Avoid disturbing asbestos materials yourself.

### Asbestos, Waste Management, Maine Department of Environmental Protection

In addition, the Mine Safety and Health Administration MSHA , another component of DOL, enforces regulations related to mine safety.

### Asbestos

If you touch or disturb the material, you risk releasing the fibers into the air. You should also use a powerful vacuum to clean up, rather than sweeping excess materials. Asbestosis resembles many other diffuse interstitial lung diseases, including other.

### Asbestos Certification

What if the asbestos material is damaged? When asbestos fibers are breathed in, they may get trapped in the lungs and remain there for a long time. If there is asbestos is present, proper procedures must be used before the material can be disturbed removed, or cut. If a material shows signs of damage such as tears, cracks or water damage, talk to a professional consultant.

### Asbestos and Cancer Risk

As these age and wear or are disturbed in some way, like a home renovation, toxic fibers may become airborne and lead to dangerous exposure. Mesothelioma is closely linked with asbestos exposure. For more information on this type of notification see , and WRD 23.

### **Banning Asbestos In The United States**

Asbestos is still used today.

### **Asbestosis**

Once they are trapped in the body, the fibers can cause health problems. Merewether found that greater exposure resulted in greater risk.
