LEY LINES

Note that, in general, any given set of points that are aligned in this way will contain a large number of infinitesimally different straight paths.

LEY LINES

A number of studies have examined the mathematics of alignment of random points on the plane. People are encouraged to share their personal spooky experiences, and influences. Or magic which is the same thing.

Alfred Watkins

In these cases it is doubtful whether the explorers went below the natural ground surface and really tested if a primary burial existed. One way of understanding this phenomenon is to see that the increase in the number of possible of sets of points in that area overwhelms the decrease in the probability that any given set of points in that area line up.

Old Straight Track by Watkins Alfred

Watkins' ideas also influenced contemporary , including 's Lud Heat 1975 , which in turn influenced 's novel 1985. Michell, J, The View Over Atlantis, 1969, third edition, revised, Garnstone Press 1975, 8vo, printed pictorial boards, 8 + 211pp including index, with many illustrations in the text + 32pp of plates and notes; an earth mysteries classic, one that heralded the modern revival of interest in the ley phenomenon of Alfred Watkins and the sacred geometry of the land.

LEY LINES

This has been put forward as a demonstration that and other similar mysterious alignments believed by some to be phenomena of deep significance

might exist solely due to chance alone, as opposed to the supernatural or anthropological explanations put forward by their proponents. And Finally ... Veronica asked me to mention this information which she passed on to me in the autumn of last year. It is the book which introduced the concept of 'ley lines'.

The old straight track : its mounds, beacons, moats, sites, and markstones : Watkins, Alfred, 1885

The Irish people are awakening, and they are beginning to understand what is under their feet and all around them. The keep-it-simple-stupid principle would put them in a straight line. The line itself covers a distance of over 500 kilometers.
