Marquis Who's Who

However, there are exceptions, for instance in China where the suicide rate in rural areas is higher among women than men. One third of all of the COPD deaths and disease burden in women is caused by exposure to indoor smoke from cooking with open fires or inefficient stoves.

Women's Health

Pregnant adolescents are more likely than adults to have unsafe abortions.

Women's Health

Pneumonia, prematurity, birth asphyxia and diarrhoea are the main causes of death during the first five years of life. Tobacco is a leading risk factor for NCDs and its use is increasing among young women in the Region. Both death rates and the causes of death are similar for boys and girls during infancy and childhood.

Marquis Publications

Depression is the leading cause of disease burden for women in both high-income and low- and middle-income countries. Each of the 41 new Dover arrivals have a guaranteed £36k in benefits whilst OAP's get £179. Women are not just childbearing vessels.

Marquis Publications

Adult women with disabilities are at least 1.
