Our compounds are FenStop, Aliette and Disarm O that, in our opinion, are the best bet for controlling downy mildew.

A Guide to Growing Magical Mums

If so, no problem, it will not harm the plants. It has a mode of action that is slightly different than a lot of other products that are on the market so it does offer an option for good rotation, especially for producers. At this time we do look for more information to maintain the beauty of our gardens and with the coming fall season, and to plant fall flower, fall plant-like garden mum which is a must-have.
