## Cercospora Leaf Spot of Roses

Study the epidemiology of Sigatoka leaf spots to understand the effect of local weather conditions on the pathogens. Aphids attack the tree by sucking the sap from leaves.

### Fact sheet

Sap feeding weakens the tree.

### HS

Attacks the leaves, usually in late summer.

## Mycosphaerella leaf spot

Cool, wet weather favors infection.

## Leaf Spot Tree Disease: Prevention and Control

This pervasive citrus tree disease creates circular lesions, or scabs, on citrus fruit, leaves, and twigs.

## Diagnostic Guide to Common Home Orchard Diseases

The best time to assess disease severity is to observe canopy density and premature leaf drop during February and prior to the emergence of the spring flush.
