Lunar Lake: palaeomagnetic evidence of shock origin

Puura, V. - Ainsaar L. The terrestrial meteorite and meteorite yield of 100-10 6 g bodies derived from fragmentation of Apollo objects is re-evaluated using this estimate, together with more recent data on asteroid albedos and on hypervelocity impact.

'+'

The Journal of Geology 72-4; pp. THE New Quebec Crater is a circular lake-filled depression, two miles in diameter, in the acid Archaean gneisses of northern Quebec 61. Although an origin by meteorite impact was postulated for the crater 15 years ago 1 by comparison of the topographic form with that of known impact craters, detailed geological studies during 1962 have failed to discover meteorite fragments, highly shocked or shattered rocks.

Millman, Peter M.

Workshop Cryptoexplosions and Catastrophes in the Geological Record Paris.

'+'

T-boundary; fingerprints of a meteorite impact?.

[Download PDF] Chemistry Addison

The Journal of geology 109; pp. Book of Abstracts, 1999, 147. Earth and Planetary Science Letters.

Lingua Terrae Books Planetary Geology/Meteorites

London, Geological Society Special Publication 356; 307 pp.

The terrestrial cratering record: II. The crater production rate

Geologie en Mijnbouw 49-3; pp. The diamond-containing sample of the Canyon Diablo meteorite investigated by the author has experienced a shock pressure of up to 1 mgbar during the explosion.
