### Dating in Archaeology

A line level and plumb bob are used for mapping and drawing profiles of the stratigraphy seen on the side-wall of an excavation unit. The artifacts are stored in appropriate bags, boxes and other storage materials, and in a storage facility with a stable climate, in order to ensure their long-term preservation.

Lane spacing should be less than the sonar swath, thereby allowing for overlap between lanes e.

### Archaeological Survey & Exploration: Its Method and Technique

And, most critical for the growth of the discipline, Fiorelli began a school for archaeological methods, passing along his strategies to Italians and foreigners alike. Another established method of dating is potassium-argon dating.

### Archaeological Dating Techniques

Qualified auxiliary personnel should be secured prior to an undertaking. The goal of chronological and contextual analysis is to write and publish records of ancient history.

### Science Notes

The diggers may work at a variety of jobs or they may specialize in certain jobs such as troweling, screening, or removing dirt or refuse. For more precise identification of metal, X-Ray Energy Spectrometry XES, also described in texts as Energy Dispersive X-Ray Spectrometry, or EDX is commonly used. These are- 1 Geographical information-data of antiquities and archaeological sites.

### What Are the Different Archaeological Methods? (with pictures)

Keep all materials collected from a submerged environment stored wet until they can be transported to a conservation facility for treatment. With

geophysics, you have the coverage and it can give you a much broader picture about a settlement plan. Moore stated that the discovery of the six temple ruins, as well as the man-made mound, indicated that the region was probably regularly inhabited for much of the 1,000 years preceding the construction of Angkor Wat.

### **Science Notes**

Keep the system as simple as possible to serve the demands of the conservation, research, and reconstruction processes that follow.

### **Handbook of Archaeological Methods**

Maintain a forward or downward-looking camera angle during passes, and avoid panning as much as possible; this will maximize probability of reference point recognition in software applications.
