The center piece had an end-knob imperfection commonly called a crown or bullion which was sold as part of the window or more frequently as a small piece of decorative glass over or alongside windows and doors. An outbreak of cholera in 1832 killed 79 people.

Antique Cups and Saucers

Worcester was probably surrounded by a ditch and an earth rampart with a wooden palisade on top. Since there is no precise formula for obtaining a balanced exposure, shots should be bracketed three to five shutter speeds up and down to find the best exposure.
