Cursors off the back button, please.

Japanese Grammar

If it sounds like by translating it directly, you most likely need to add a particle for clarification. Everything has a certain property which is either true or false.

The Difference Between the Particles and

This can be easily seen when talking about a country or a language.

Japanese Grammar

I think you've got the hang of things now! So, this sentence is talking about tomorrow the topic, but the main action being described — falling — will be performed by the rain the subject. Obviously, though, this depends on the kind of person you are and the kinds of conversations you have! So the focus is on the action surrounding our theme. They tell us where things happen, who does what to what, indicate direction, topic, subject and so on and so forth.
