Premedication Before Dental Treatment

Patients should maintain a thorough oral care routine of brushing twice daily and flossing once daily and follow the recommendations of their healthcare professionals — both dental and medical — to keep their mouth and body healthy. Oral Surg Oral Med Oral Pathol 1973;36 3 :321-8. Tribune Group GmbH is an ADA CERP Recognized Provider.

Premedication Before Dental Treatment

The management of dental anxiety: time for a sense of proportion? Although it is a drug to be avoided in patients with reduced intracranial compliance, intramuscularly delivered ketamine can be considered in patients who have no intravenous access, who will not tolerate an oral premedication, and who will benefit from premedication.
