Post

The Czech Republic has only small proven reserves of oil and , but relatively abundant recoverable reserves of coal. The functioning of this sector combines economic, legal, social and political elements, but this study focuses mainly on the economic and social ones which should influence the shape of the legal and economic system as a factor that supports the effectiveness of housing mechanisms. The average growth rate of Western European cities recovered in the late 1980s following the nadir in the early 1980s, but this was followed by a setback in the 1990s.
