PLANT DISEASES CAUSED BY NEMATODES

DK 50 plants generally were larger than those of P8333 Wenefrida et al. Agricultural Experiment Stations, University of Florida, Gainesville. Preliminary research indicates a potential for management of these nematodes in the biological control of aquatic weeds Gerber and Smart, 1987.

PPE 212: Biology of Plant Parasitic Nematodes

Sedentary endoparasites: The most damaging nematodes in the world have a sedentary endoparasitic life style.

Cell Biology of Plant Nematode Parasitism on Apple Books

These nematodes swell and do not move once they have entered into the endoparasitic phase of their life cycle.

11 Main Types of Plant Parasitic Nematodes

Although crop rotation is at present probably the most successful control measure, it is by no means completely effective.
