## Health Beliefs and Perceptions: Implications for Type 2 Diabetes Self

Using these medicines some people have permanently free of diabetes. Type 2 diabetes mellitus is, therefore, a major public health concerns affecting the middle-aged population. Twelve percent were current smokers.

## Health Beliefs and Perceptions: Implications for Type 2 Diabetes Self

Glycemic control was considered good, acceptable or poor when HbA 1c levels were less than 7%, 7 to 8% and greater than 8, respectively, according to the American Diabetes Association's recommended guidelines.

## Illness beliefs and the sociocultural context of diabetes self

When people think about control of diabetes, they may think more broadly than just about their HbA1c level. In our study, income was only associated with better self-reported health, but not with the diabetes-specific measures. Rhee MK, Cook CB, El-Kebbi I, Lyles RH, Dunbar VG, et al.

## Health Beliefs and Perceptions: Implications for Type 2 Diabetes Self

Tel: 02082094465; Email: Citation: Lawal M, Woodman A 2020 Health Beliefs and Perceptions: Implications for Type 2 Diabetes Self-Management. This can help to avoid crisis management and support people with diabetes to be comfortable and confident in their decision making.

## Beliefs, behaviors, and modifications of type 2 diabetes self

Field notes and written memos were used to help develop interpretations during analysis.
