The Rise of Income and Wealth Inequality in America: Evidence from Distributional Macroeconomic Accounts

Between 1978 and 1980, to keep pace with urban demands, Mexico actually imported over one million tons of wheat in each of those years as irrigated latifundia reached their limits of productivity or converted to other profitable cash crops. Today, the PRI heavily subsidizes wheat cultivation among northern latifundistas, while allowing maize cultivation to remain the task of more traditional campesinos and ejidatarios.

At the same time, both governments recognized a link between Amerindians and physical nature which has not always worked to the advantage of the indigenous population. In Mexico, elite definitions and categories of understanding have shaped reality since pre-Columbian and colonial times, using land and food management, to define the social order. Our readers have come to expect excellence from our products, and they can count on us to maintain a commitment to producing rigorous and innovative information products in whatever forms the future of publishing may bring.
