

# From farmers to fishers - developing reservoir aquaculture for people displaced by dams

## World Bank - The Pulses of the Mekong River Basin: Rivers and the Livelihoods of Farmers and Fishers

Description: -

-  
Electric utilities -- Taxation -- France.  
Trusts and trustees -- Great Britain.  
Inheritance and transfer tax -- Law and legislation -- Great Britain.  
Executors and administrators -- Great Britain.  
Fish-culture -- Indonesia  
Fishery management -- Indonesia  
Dams -- Social aspects -- Developing countries  
Forced migration -- Economic aspects -- Developing countries  
Freshwater fishes -- Developing countries  
Fish-culture -- Developing countries  
Fishery management -- Developing countries  
From farmers to fishers - developing reservoir aquaculture for people displaced by dams

### Low input of offshore areas to fisheries in a large tropical reservoir in Lao PDR

Your Complete Project Material will be sent to your Email Address in Ms Word document format Can I get my Complete Project through WhatsApp? Acknowledgements Published with funding support from the Director of the Illinois Office of Research, College of Agricultural, Consumer, and Environmental Science, University of Illinois, Urbana, Illinois and the Iowa Agriculture and Home Economics Experiment Station, College of Agriculture and Life Sciences at Iowa State University, Ames, Iowa.

### INTEGRATED FISHERIES RESOURCE MANAGEMENT

This chapter looks at the impacts of hydropower development on fisheries resources using the Bui dam project as a typical case study.

#### Socio

Our research began in 2005 Figure 18 Archaeological plan of a large stone-walled fishtrap, Lake Condah After: Coutts et al. Water Resources and Rural Development, 4, 67-84. A starting point in answering these questions is to better understand the current roles Mekong farmers and fishers play in the food system; and their future potential in protecting and managing the soil and water resources of the main stem river, tributaries and floodplains.

#### Fisheries

Fisheries engage the entire value chain from catch and farmed to cleaning, drying, pickling and processing to marketing. Modernization and Development Projects 2. Despite the relatively large information base available in freshwater aquaculture development and capture fisheries

management in Asia, there were no previous experiences anywhere involving the resettlement of such a large number of persons through a planned development program of reservoir cage aquaculture, and its allied land-based aquaculture support systems such as hatcheries and nurseries.
