Car Park systems

Normally they are placed on top of the main beams, which makes construction depth bigger than other car park decking methods.

Car Park Construction

The use of a or for the upper levels is a good solution to minimise the loads on the podium level. A light and airy environment should be one of the major goals of the car park designer.

Car parks

Large retailers also procure large and many chains are diversifying and consequently procuring that for planning reasons often include a number of upper floors of use. Transforming what were historically seen as functional buildings, from an architectural perspective, to award winning, architecturally significant buildings that shape our urban landscape today. This is probably the most popular layout in the UK for car parks with row capacities greater than 24 cars.

Retail buildings

The dimensions of large, standard and small size cars are well established and are given by the Institution of Structural Engineers.

50 Years of Car Parking History

Using a single width has the advantage of visually separating the stalls for the driver, but it is not suitable when using internal. Consideration should also be given to the potential for the future development of the car park.

Car Park Decking

Three hours free parking is available at Captain Cook Square and Ferry Road car parks only - Please note, motorists parking free for three hours still need to have a pay and display ticket. The screed will be 50mm deep, but costs about the same to place as the 140mm in situ deck below.

Our range of mechanical sweepers are suited to most requirements and we have extensive experience of providing operated sweeping services in all environments.

Car park locations and charges

Similarly measures that increase heat loss or reduce solar gains, increase emissions from space heating and reduce those from cooling.

Car Park Cleaning

The layouts indicated are those most commonly used in the UK. They require marginally more space and are therefore less structurally efficient than one-way systems.
