### Marital Quality and Income: An Examination of the Influence of Government Assistance

The one-child policy contributed to a drastic change in the sex ratio because female fetuses were aborted by parents who wanted their only child to be a boy. This chapter considers two connected themes in anthropological research in urban China.

### Wellbeing in China

Prior studies clearly show that stress undermines health and well-being, and strains in relationships with family members are an especially salient type of stress. Details of the methodology are reported elsewhere Chomitz 1992. In 13 of those 15 counties, at least 45 percent of households had unmarried daughters picking cotton.

### The Javanese family

We find a complex relation between wealth and FB models A1 and A2;. Journal of Family and Economic Issues, 31, 185—197. In one of your comments you said you would ONLY marry a man who made as much or more than you because you want to live in an affluent area and be able to afford private school, etc.

### ERIC

Before the reform and opening-up, and even during the first two decades of the reform, premarital sex and cohabitation were considered shameful and unacceptable by mainstream society. Using median values for birth year and household wealth, and median coefficients for categorical values, the fitted FB-predictor models A1 and A2 indicate that girls producing commercial handicraft were 1.
