## RFC 1430: A Strategic Plan for Deploying an Internet X.500 Directory Service

Distribution of this memo is unlimited. This establishes a binding between these user credentials, the user's public component and the organization which vouches for this binding.

## ISO/IEC 8208 : 2000(R2005) INFORMATION TECHNOLOGY

Before a client attempts to connect with a server, the server must first bind to and listen at a port to open it up for connections: this is called a passive open. The guidelines should describe a minimum level of quality that has to be supplied to make the service operational.

### Data networks, open system communications and security

Long Term Requirements - To make sure that X. OSPF implements its own transport layer error detection and correction functions.

### Osi layer and network protocol

It operates on a best effort delivery model, in that it does not guarantee delivery, nor does it assure proper sequencing or avoidance of duplicate delivery. Procedures for data and interrupt transfer 6.
