## Ancient Arctic 'gas' melt triggered enormous seafloor explosions

Carbon dioxide also diffuses into the oceans and slowly makes them more acidic.

**Signal processing for the 1992 barents sea tomography experiment : McLaughlin, Philip G. : Free Download, Borrow, and Streaming : Internet Archive**

Trajectories of the four icebergs are very similar during the first month, but they differ toward the end of the period.

## Capelin in the Barents Sea

That provided all the pressure and cold needed to keep the methane hydrate stable, Andreassen explains.

## Ancient Arctic 'gas' melt triggered enormous seafloor explosions

Pressure waves are broadcast into the water. The Svalbard archipelago is the secondary source, particularly the Stonebreen glacier on Edgeøya.
