PSC Issue #1: Report

This pioneering partnership plans to promote collaborations between Industry, Scientific Community, Academia, Key Opinion Formers and Domain Experts with FSSAI to co-produce food safety as a shared responsibility.

CAB Direct

Keep in mind that there is still a lot of leeway in these labeling laws. All food additives are carefully regulated by federal authorities and various international organizations to ensure that foods are safe to eat and are accurately labeled.

Overview of Food Ingredients, Additives & Colors

A tailored service delivered in a safe, discreet and legally compliant manner. Scottish Food Enforcement Liaison Committee SFELC has initiated surveys, projects and co-ordinate specific investigations to support Food Standards Scotland FSS , Local Authorities and other bodies. Furthermore, all additives are subject to ongoing safety review as scientific understanding and methods of testing continue to improve.

ISO

Although the panel said that elimination diets should not be used universally to treat childhood hyperactivity, since there is no scientific evidence to predict which children may benefit, the panel recognized that initiation of a trial of dietary treatment or continuation of a diet in patients whose families and physicians perceive benefits may be warranted.
