Bulletin of the Fisheries Research Board of Canada

The fish involved in the large Biscayne Bay kills included striped mullet, snook *Centropomus undecimalis*, Gulf flounder *Paralichthys albigutta*, and striped mojarra *Diapterus plumieri*. However, dead flounder do not float and because of their shape they are not easily trawled or dredged, so some mortalities could have easily escaped notice.

Vernon Everett Thatcher

Pre- and post-metamorphic stages of two parasitic Amazonian copepods.

☐ Диссертация: промысловых рыб из открытых вод Северной Медицина

Not only does the parasite cause mortality of these farmed salmon, it also causes over 80 % mortality of wild juvenile salmon *Oncorhynchus gorbusha* in the waters adjacent to the farms. Location: cysts in gills, mesenteries, skin Hosts: *Ambloplites rupestris* 4,7 *Anguilla rostrata* 3,6 *Catostomus commersoni* 3 *Cottus bairdi* 4 C. *Advances in Parasitology* 33: Rohde, K. *Amphiliidea*.
