### Nursing, knowledge and power: A case analysis

Out of respect for our students, graduates, patients and their families, we need to work concertedly with one another and with those in other systems to advance the patient safety movement.

### Nursing, knowledge and power: A case analysis

The nursing education system can benefit from the systems analysis and safety experience of other disciplines, systems and industries. What does this mean for nursing and other healthcare provider education? It includes the identification of root and contributory factors, identification of risk reduction strategies, and development of action plans along with measurement strategies to evaluate the effectiveness of the plans. These students engage in discussions regarding national trends in patient safety, apply systems models to authentic case studies and reflect on their clinical practice experiences from a systems perspective.

### Nursing, knowledge and power: A case analysis

Such limits are neither good nor bad in themselves, but rather have effects with which we must be concerned.

### Case Study: On the Leading Edge of New Curricula Concepts: Systems and

This message is not intended to be critical or accusatory.

### Case Study: On the Leading Edge of New Curricula Concepts: Systems and

Discussion and Conclusion No patient should be harmed as a consequence of their experience with Canada's health system.

### **Nursing, knowledge and power: A case analysis**

Given this reality, we believe that patient safety will be a defining issue of healthcare in Canada over the next 20-30 years CPSI 2004.

### **Nursing, knowledge and power: A case analysis**

In 2002, the landmark document Building a Safer System: A National Integrated Strategy for Improving Patient Safety in Canadian Health Care was released National Steering Committee 2002.
