Manchester University Press ND, 2006. Perhaps one of the greatest confusions in many discussions of Ionesco's theory of acting arises from a misunderstanding of the actor's relationship to the role. He speaks of a charitable solution for the actor and director and gives sound advice that is all too frequently ignored: On the whole I would agree that actors and directors searching for legitimate psychological motivation in my characters would get nowhere fast.

Such gathering up is a tedious process, but eventually the plunge does come and you fall headlong into the final form of the character, becoming one with it. In this study, first published in 1985, Austin E. Use terms from the appropriate class readings.

Waiting for Godot

A drama resource for years 12-13 based on the play by Samuel Beckett

Introduction

This drama teaching and learning resource was developed around the play *Waiting for Godot* by Samuel Beckett. It is based on the resource kit for teachers produced by the Auckland College of Education and the Auckland Theatre Company (ATC) Education Unit for teachers and students attending the ATC's production of *Waiting for Godot* in 2002.

Overall, it gives a comprehensive picture of how a professional drama production is mounted. Although some of the resource is specific to this production, overall it provides valuable, and often generic, resources and classroom activities for those who have not seen that production.

The resource includes:

- background material on the playwright, the play, and relevant dramatic forms
- interviews with the actors and designers
- related learning activities.

Using this resource

Teachers will find these materials and activities valuable both for studying this play, and as a comparison and template for studying other plays and productions, and for learning about performance practice.

For example, teachers may decide to:

- use the information and activities on theatre of the absurd and existentialism when studying dramatic form
- adapt the learning activities about exploring roles and status when teaching practical drama in the classroom
- refer to the interviews and activities on the development of set and costume design in the context of a class production.

What Pinter wrote is always better than what a lazy actor will come up with. Instead it consists of active concentration on the interplay between actors who are reading the subtlest nuances of gesture.

If you hang on to the moment, you lose the play--because that one moment has already passed and you are at the edge of another. Helene Weigel's Governor's Wife seated herself upon the backs of servants, and spoke in the assured, brutally confident manner of a born ruler.

OLD WOMAN caressing him : You're breaking my heart, don't cry, my little one. But the theatre is more than words: drama is a story that is lived and relived with each performance, and we can watch it live.
