## Ambulance services are a key player in end of life care team, NHS guide concludes

SR contributed to the study concept and critically reviewed the manuscript. NTU we recognise the commitment and achievement required to take part in national voluntary adult and cadet programmes, particularly those with a focus on health and first aid, such as St John Ambulance, Territorial Army, Army Cadets, 999 Academy or Community Responder programme.

## Scientific summary

Paramedics continuing to practice as a companion profession to medicine under a delegated practice model is inconsistent with this vision. The main cases students were exposed to during clinical placement are presented in Table. .

## Experience > View Opportunity Details

Having consolidated your clinical practice, you will also be eligible to apply to train as a paramedic.

## Training ambulance staff to help patients in a mental health crisis

It explicitly critiqued the place of medical direction in paramedic services, while a UK paper by McCann examined the tension between the professionalization of paramedics and the strong position of power that medical directors and others exercise.

## Training ambulance staff to help patients in a mental health crisis

This theme largely emanates from the UK and Australia where the professionalization of the paramedic workforce is well advanced, with considerable progress having been made toward the professional regulation of paramedics through State sanctioned registration of paramedics and the almost complete transfer of paramedic education into their respective higher education systems ; ;. The view that medical oversight and direction are essential to the operation of paramedic services is not universally accepted, with some high-performing paramedic services operating without any legal or regulatory requirement to involve the medical profession in their operation and management ;. Please note: the GCSE entry

requirements will still apply.

### **Clinical leadership in paramedic services: a narrative synthesis**

The medical director is responsible for patient care activities performed by paramedics, taking responsibility for their appropriateness, and that these activities are within their scope of practice and operational expectations ; : Physicians have advocated that physician medical direction, regardless of other design features, will produce reliable response times and quality. However, if systems with physicians in direct control of operations do not always produce reliable response times or safe policies this could lead decision makers to consider other design features in order to ensure quality. I promised to summarise and publish the conclusions from the event and the discussion and submit them to the.
