### The age of celadon

From this period many variations of celadon were developed, including the famous Yue ware and Longquan pottery a city that sits on the Chinese coastal province of Zhejiang. The Korean white porcelain differed in design from the Chinese wares in that the elaborate

decoration techniques used by the Chinese were never practiced, and the resulting wares had a simpler, more elegant look. Jar Blue and White Porcelain with a Painting of a Person Visiting His Friend Ming Dynasty, Tienchun The National Palace Museum, Beijing Bottle White Porcelain Chosun Dynasty, 15th Century The National Museum of Korea, Seoul Foliated Plate Porcelain with Dragon and Tiger in Overglaze Enamels Middle Edo Period, 17-18th Century, Arita Ware - Kakeimon Style The Aichi Prefectural Ceramic Museum

### An Overview of Celadon Pottery

Japan also produced Sue ware which was used primarily as storage vessels, up through the 11th century. It was a method that not only dominated the early ceramics scene, but became a benchmark of influence for potters across the globe.

### An Overview of Celadon Pottery

They later used the brilliant white background on the wares as the perfect backdrop for designs of brilliant blue patterns that are still popular on Chinese ceramics today.

### An Overview of Celadon Pottery

By the 10th century they had developed their own unique style of ceramics which included a rough celadon, that was based on the the earlier influences of China. Ash ware and lead-glazed wares also were briefly produced in Korea but were soon replaced by the introduction of celadon from China. Sometimes the works were etched with a delicate style called sanggam.

## **The age of celadon**

Thailand also produced a number of different styles of earthenware and eventually adopted the production of celadon from China. Gray ware similar to that produced by the Chinese, was made in Vietnam at the same time it was produced in China, and by the 6th century Vietnam was producing a celadon-like type of ash-glazed ware of their own. During the 2nd and 3rd centuries B.

## **An Overview of Celadon Pottery**

The quality of the Korean celadon, according to many experts, both Korean and Chinese, came to surpass that of even the Chinese celadon that it was derived from. It was followed by earthenware and the red Haji ware of the period.
