Telling The Time

It's quarter to seven, it's ten to seven ... MELISA: That's right! MELISA: Because a quarter of the hour has passed! They focused on two genes: firstly, a gene called ytvA which encodes a blue light photoreceptor and secondly an enzyme called KinC that is involved in inducing formation of biofilms and spores in the bacterium. When the big hand is pointing to the six, we say it's half past. Children can learn to tell time to the hour, half hour, quarter hour, five minutes or minute using both 12 or 24 hour representation.
