NYPA Initiatives

About NYSEDA NYSEDA, a public benefit corporation, offers objective information and analysis, innovative programs, technical expertise, and funding to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels. REV is building a cleaner, more resilient and affordable energy system for all New Yorkers by stimulating investment in clean technologies like solar, wind, and energy efficiency. So, as an industry, we need to start figuring out ways to reinvent and reimagine the cultural paradigms we currently operate under in the energy industry — while providing the best value and outcome for our customers.

Working with Rensselaer Polytechnic Institute, NYPA will combine model-based power system simulation with early warnings from data and applications to improve timely decision making. The installations are expected to begin in January and complete in the spring. We use clear, concise language to convey the idea that participation is easy and will not disrupt work.

New York Power Authority to upgrade Grand Central Terminal platform lighting with energy

The Daylight Hour initiative provides an excellent opportunity to promote energy efficiency in the workplace and to start a meaningful dialogue with employees about energy consumption and reducing greenhouse gas emissions. Standard Photo: University Herald No matter how intelligent it might get, the smart grid will always be on a learning curve. About NYPA NYPA is the largest state public power organization in the nation, operating 16 generating facilities and more than 1,400 circuit-miles of transmission lines.

NYPA Initiatives

If they were one city, it would be the 11th most populous city in the U. NYPA has reached or exceeded its MWBE goal for over 15 consecutive years.

energy efficiency

Cyber-security is, of course, vitally important, Ettlinger said, but keeping the control offline is not the way to go.
