HIV and AIDS (for Teens)

Helen is happy when she learns that she is pregnant, but soon finds out that she also has genital herpes. It is important to begin talking with your children at an early age, so that you all become comfortable with the subject and the words used to talk about it. The immune system becomes weaker, making it harder for the body to fight off infections and some kinds of.

Working with Young People on Sexual Health and HIV/AIDS

Yet nearly half of young people who are living with HIV don't know it. Does not cover health issues in detail but has many activities that could be adapted.

Education can help prevent HIV and AIDS

In this video they show how they are coping with living with what support they need and how they are addressing discrimination through educational programmes with young people. Designed for use in South Asia. It is also important to explain that while HIV is serious, it can be prevented and treated.

How education plays a key role in the fight against AIDS

Health care providers usually can tell if someone has HIV through blood tests. Since Higher Education Institutions HEIs are reservoirs for future leaders and professionals, it is essential that they adopt strategies of lower prevalence, with no new infections. For more information, see our fact sheet on.

HIV and AIDS (for Teens)

They can understand that HIV is a serious health problem which is caused by a virus, and that their chances of getting HIV are very low. Another reason may be that these young people have been less likely to receive relevant, effective prevention education and interventions. Whiteside,

AIDS, Public Policy and Child Well-Being Edited by Giovanni Andrea Cornia , Chapter 11, UNICEF Innocenti Research Centre, 2007.

Impact of HIV/AIDS on Education and Poverty
