Torch Ginger Photo credit: Shi Biying and Tok Yin Xin The Torch Ginger Etlingera elatior is a herb with very large prominent pink torch-shaped flowers. For more information about the flora and fauna found in Singapore, please visit NParks.

### From Flower to Fruit

Other Considerations Now that we understand pollination partners and blooming periods there is an extra caveat to consider. Did you know that fruit bats also have an important role as pollinators and seed dispersers in many of our gardens? They help to ensure the regeneration and survival of many different plants.

### From Flower to Fruit: The Mysteries of Apple Pollination — Seattle's Favorite Garden Store Since 1924

In early May, apple trees are covered in apple blossoms. These plants help to increase fruit yield from edible crops and offer a habitat for local biodiversity. Anne Ophelia Dowden's lucid text and meticulous illustrations describe how the different parts of flowering plants function, how fertilization occurs, how seeds are produced, how flowers mature into fruits, and how, millions of years ago, 'seeds changed the world,' making it habitable for mammals.
