The Relationship Between Science and Religion

During the early part of the course students come to me, year after year, to express their reservations based on their perceived contradiction between Christian beliefs and the theory of evolution.

What science can learn from religion

The first is natural theology, which formulates arguments for the existence and attributes of God. To concede as much as possible to the opposition, however, let's say that this probability is either inscrutable or in the neighborhood of

Science, Religion, Evolution and Creationism: Primer

Tennyson's concern lies in his conviction that modern technologies promise advancement yet fail to recognise that the human race is 'savage'.

Genesis And Science: More Aligned Than You Think?

The latter defended a form of metaphysical naturalism, denying the existence of gods or karma. Often credited to Darwin and his 1859 *Origin of the Species*, the theory had actually been taking shape for several years. Coffman, Robin Collins, Tom Crisp, Chris Green, Jeff Green, Dan McKaughan, Brian Pitts, Luke Potter and Del Ratzsch.

Naturalism vs. Evolution: A Religion/Science Conflict? (The Great Debate)

But one who has a defeater for R has a defeater for any belief she takes to be a product of her cognitive faculties -- which is of course all of her beliefs. God gave us reason, and God gave us faith. But those properties will be adaptive, whether or not the content the having of which they constitute, is true.

Religion and science in the 19th century

Had a given such structure had a different content, one thinks, its causal contribution to behavior would be the same.

The Relationship Between Science and Religion

According to Genesis, humans are the result of a special act of creation.
