Human Protozoology.

Which form of leishmania is injected to animal model for lishmanization? Chagas' disease is the leading cause of heart disease in south and central America.

Human Protozoology.

Nearly all of the cases identified by microscopy as *P. Balantidium coli* is the only ciliate which infects humans.

Human Protozoology.

Sexual partners should be treated at the same time to prevent reinfection. The continuous land connection at the Panama Isthmus, which formed 2-5 mya, led to an exchange of mammals and thus a geographical mixing of the two types. Superficial inflammation of the colonic mucosa may occur which can result in diarrhea and colicky pain.

Kinetoplastid Biology and Human Disease

Moreover, since many patients with *Trichomonas* infection are asymptomatic, or only mildly symptomatic, they are likely to remain sexually active in spite of infection.
