As changes and adaptations are made in the areas of building materials, construction technology, energy management, and conservation, there is a need for change as it applies to the awareness of security, emergency preparedness, and overall management practices. He is the coauthor of the previous edition of The Facility Management Handbook, as well as coauthor of The Facility Manager's Emergency Preparedness Handbook. Technology systems, disaster recovery planning, zoning compliance, furnishings, recycling programs, grounds maintenance--it all falls under the facility management umbrella.
