

# Upper atmosphere research satellite - remote atmospheric sensors.

## National Aeronautics and Space Administration - Upper

Description: -

-

Draft.

Armed Forces -- Mobilization.

Electronic industries -- United States.

Semiconductors.

Poultry -- Standards -- United States.

Meat industry and trade -- United States.

United States -- Economic policy.

Land use -- United States.

Plant-soil relationships.

Soils -- Nitrogen content.

Lightweight concrete.

Hardwoods -- United States.

Gypsy moth -- United States.

Solar energy.

Solar collectors.

Electronic instruments -- Maintenance and repair.

Apprentices -- United States.

U.S. Army Signal School -- Curricula.

Clinch River Breeder Reactor Demonstration Power Plant (Tenn.)

Federal aid to regional planning -- United States.

Appalachian Regional Commission.

Air bag restraint systems.

Automobiles -- Seat belts.

United States. -- National Highway Traffic Safety Administration.

Motor fuels -- Economic aspects.

Automobiles -- Fuel consumption -- Economic aspects.

Pension trusts -- United States.

Pensions -- United States.

Radio frequency allocation.

Expansion (Heat) -- Measurement -- Automation.

Expansion (Heat) -- Measurement -- Data processing.

Sulphur.

Sodium.

Storage batteries.

Energy consumption -- Minnesota -- Detroit Lakes.

Power resources -- Minnesota -- Detroit Lakes.

Energy policy -- Minnesota -- Detroit Lakes.

Radiation -- Physiological effect.

Nuclear weapons -- Testing -- Physiological effect.

Valves -- Testing.

Agriculture, Cooperative -- United States.

Nuclear fusion.

Isotopes.

Germany (West) -- Politics and government.

Press and politics -- Germany (West) -- History.

Frankfurter Allgemeine.

Adenauer, Konrad, 1876-1967.

Electrodes -- Testing.

Magnetohydrodynamic generators.

Bills, Legislative -- United States.

Belarus -- Politics and government.

Soviet Union -- Politics and government -- 1985-1991.

### UARS: A Model Data Set

The UARS Microwave Limb Sounder MLS demonstrated that there is a direct link between the presence of chlorine, the formation of chlorine monoxide during winter in the Southern Hemisphere, and the destruction of ozone Figure 5. HALOE operated by observing 28 solar occultations; i. UARS DATA MANAGEMENT The UARS data set will furnish by far the most comprehensive and detailed picture yet obtained of the chemistry, dynamics, and energy balance of the upper atmosphere.

### Satellite Sensor

Missing data are shown in grey. Click on the figure to go to the time series browse tool.

### NASA

Both of these findings have important implications for terrestrial life and human societies. Figure 1 shows an example of an

## GLOBAL ATMOSPHERIC CHANGE

Study of Global Change The national  
 mandate for UARS dates to 1976, when  
 the U. What should I do if I find a piece of  
 UARS after its fall? This map shows the  
 ground track for UARS beginning in the  
 Indian Ocean off the coast of Africa at  
 0330 GMT and ending at atmospheric  
 interface over the Pacific Ocean at 0400  
 GMT.

## Remote Sensing Systems

The mean meridional circulation and mixing  
 from breaking planetary waves strongly  
 influences the distribution of long-lived  
 chemical tracers. Since the spectra of  
 ozone, nitrogen dioxide, sulfur dioxide, and  
 certain aerosols are well known, scientists  
 can directly correlate SAGEs readings with  
 the presence of these substances within the  
 stratosphere. However, advances in such  
 operational programs have depended upon  
 experimental instruments developed by  
 NASA for scientific research.
