## Doktorgradsdisputaser ved Det teologiske fakultet fra 1876 til 2007

Science is incompetent to reason upon the creation itself out of nothing. The campaign reached its climax shortly after the turn of the century when Catholic schools were closed and thousands of monks and nuns expelled. They were known, more or less intuitively, from the earth and planetary sciences, and also from plain observations of the decay occurring on the surface of the Earth.

## НОРВЕЖСКАЯ ФИЛОСОФИЯ

Etter langvarig strid, teologisk og politisk, ble den liberale Johs. In Matter and Spirit in the Universe, a book published by Imperial College Press in 2004, I examined the subject in connection with a broader investigation of the relationship between cosmology and Christian religion.

## Virkelighetssyn og menneskesyn

Of course, developments in twentieth-century physics and cosmology have vindicated the speculation. But, as I am of opinion, the whole of the world is of comparatively modern date, and recent in its origin; and had its beginning but a short time ago. The existence of human beings is incompatible with a maximum-entropy scenario, which indicates a relation between entropic and anthropic reasonings.

The argument from contingency was also given priority in Baschab 1923. The central theme of my study, the relationship between thermodynamics and religion in pre-Einsteinian cosmology, is focused around the concepts of decay and origin. In this respect he was, like Clifford before him, an agnostic.
