## U.S. Fish & Wildlife Service

There was one recorded instance of a female killing a bufflehead adult female and her brood. The swans, geese and ducks are mid-sized to large birds most commonly found on or near water.

### Bufflehead

Aquatic and eggs can often become locally important food items, as well. In contrast to many other seaducks that have declined in recent decades, bufflehead numbers have remained relatively constant. The bill is light blue-gray and the legs and feet are fleshy pink.

### Bufflehead

The punctual Bufflehead, *Bucephala albeola*: autumn arrivals in Shoal Harbour Sanctuary, Vancouver Island, in relation to freeze-up. The bill is dark gray and the legs and feet are grayish.

### Bufflehead

They have recently been recorded breeding at Big Meadow Lake Pend Orielle County , and the Turnbull National Wildlife Refuge Spokane County.

### Bufflehead

Most days, November through March, you can see small groups of buffleheads along the walking path on the , in Macum Creek, and in the harbor. Inland, they will remain as far north as open water permits.

### Bufflehead

Buffleheads are cavity-nesting ducks and prefer to nest near lakes and deep ponds with associated temperate woodlands. They concentrate along the coasts during the winter, with no particular area wintering the majority of the population, and they occur from the Aleutian Islands to Mazatlan,

Newfoundland to southern Florida and along the Gulf of Mexico.
