In order to achieve this, we aim to reduce emissions or achieve climate neutrality in our production, energy consumption and product life cycle. Looking ahead to the UN Climate Conference, COP26, that will take place in Glasgow in 2021, we are also reminded that not only do we need a truly national endeavour, we also need this spirit and commitment to be applied internationally. Because the two species in the system are so closely linked, they respond to external environment factors together and each species affects the evolutionary outcome of the other.
