Reproduction and Dispersal This species only reproduces vegetatively in Australia. *Gladiolus Watsonius* *Gladiolus herbarum* agri in rupibus feras invenit DC metris super mare gradu in provincia Africa occidentali cape.

Gladiolus

Gladiolus hybridizing is a hot area in the horticulture world right now, with breathtaking results. They come from corms which are planted in fall or spring. The gladiolus flowers you see in florist's shops and grow in gardens are hybrid gladiolus *Gladiolus* hybrids from interbreeding wild species that grow mostly in the Mediterranean area and Africa.

gladiolus

Dicendum quod transitus maris diversis plantis sativum concedit obtinendae variabilitatem magna ingenia, inter mole, color, reperirent nec phenology. Photo: Earl Nickel The unforgettable *Moraea villosa* is better known as peacock iris because of its striking colors.

***Gladiolus mariae* (Iridaceae), a new species from fire**

A robust, deciduous, winter-growing, perennial geophyte, 300—600 to 1 200 mm tall.

Gladiolus

Contra, in imperio Romano erant gladiolas victoriae symbolum. Flowers and Fruit The large and showy flowers are arranged in small clusters with 3-8 flowers at the tips of the flowering stems i. These patches of open shrubland vegetation are assumed to be unaffected by natural as well as anthropogenic fires, because they are dominated by fire-sensitive plant species, and because they are remote and surrounded by vertical rock cliffs and submontane forest, protecting the shrubland from the annual fires in the nearby sparsely wooded submontane grasslands.
