**The New Evolutionary Microeconomics: Complexity, Competence and Adaptive Behaviour (New Horizons in Institutional and Evolutionary Economics): 9781840648959: Economics Books @ vivchar.tom.ru**

The book charts a research programme for evolutionary economics that encompasses the theory of dynamic efficiency and emergence in markets, a computational model of the learning and interacting agent, a competence based theory of the firm and the household, and, via a theory of expectations and plans, an agent-based foundation to macroeconomics. Potts

Filesize: 30.59 MB

economics, University of Queensland proposes evolutionary microeconomics as a synthesis of the collective schools of heterodox economic thought with complex systems theory and graph theory.

**Review of The New Evolutionary Microeconomics: Complexity, Competence and Adaptive Behaviour**

The E-mail message field is required. Minor reservations as these notwithstanding, I warmly recommend Potts's book to anyone who is in for an intellectually adventurous attempt to synthesise various pioneering non-mainstream strands of theorising and modelling. Potts's book demonstrates that complex and highly abstract notions and issues can be discussed in an engaging and entertaining way.

**The New Evolutionary Microeconomics : Jason Potts : 9781840645439**

Potts here explicitly invokes the image of Robinson Crusoe, an image that heterodox economists often have objected to. Cheltenham: Edward Elgar, 2000 ISBN 1 84064 543 1 , Rotteram. This challenging new book should prove timely and important for evolutionary and computational economists as well as those in the fields of managerial economics, business studies and marketing.

**The New Evolutionary Microeconomics : Jason Potts : 9781840645439**

Annotation copyrighted by Book News Inc. And, indeed, many heterodox economists have strong leanings toward a holistic, non-reductionistic type of approach. This is an analysis at an extremely high level of abstraction, and Potts is aware of it.

**The New Evolutionary Microeconomics: Complexity, Competence and Adaptive Behaviour (New Horizons in Institutional and Evolutionary Economics) : Jason Potts: [vivchar.tom.ru.au](http://vivchar.tom.ru.au): Books**

Further, the arguments in support of the thesis are compelling and the citations upon which it draws are authoritative. And sometimes the one mathematical formalism can be translated into another.

**The New Evolutionary Microeconomics: Complexity, Competence and Adaptive Behaviour (New Horizons in Institutional and Evolutionary Economics) : Jason Potts: [vivchar.tom.ru.au](http://vivchar.tom.ru.au): Books**

The only hesitation I have here is that sometimes it seems that Potts reads too much in mathematical formalisms. He argues for a radical refocus of microeconomic research toward the evolutionary nature of institutions, preferences, technology, and knowledge.
