## Ontario Ministry of Health and Long

The case study in describes a program that extends the careers of nurses by training them to transition from the acute care to the community setting.

## The Affordable Care Act: Primary Care and the Doctor of Nursing Practice Nurse

Average Earnings of Full-Time RNs, by Highest Nursing or Nursing-Related Education and Job Title. Evans, Wood, and Lambert also examined the literature and found 16 studies that examined restraint minimization, concluding that restraint-minimization programs involving effective staff education can reduce injuries and do not increase fall rates. A number of researchers are exploring the relationship between nurse-to-patient staffing ratios and an increase in the incidence of falls.

## Transforming Education

Tuition offered to attract nurses: Morris County Home is short of staff.

## Fall and Injury Prevention

Hofmann and colleagues used three concurrent interventions—staff education, an exercise program, and environmental modifications—for a frail elderly population. The aging nursing workforce, low unemployment, and the global nature of this shortage compound the usual factors that

contribute to nursing shortages. This transition will have a particularly strong impact on nurses, more than 60 percent of whom are currently employed in hospitals HRSA, 2010b.
