## Patient Trends in Hospital Inpatient Stays in the United States, 2005

Main tables on retail trade. The reports use HCUP administrative healthcare data. Following the 2010 Census the FORHP definition included approximately 57 million people, about 18% of the population and 84% of the area of the USA.

## Reports

Effects of Possible Undercount Without an accurate census count, federal money provided to states will be distributed incorrectly. The Census reports that in 1970, the two poorest quintiles had 14.

## Two Americas: One Rich, One Poor? Understanding Income Inequality in the United States

In addition, NIS data are standardized across years to facilitate ease of use. The NIS is nationally representative of all community hospitals i. State and Local Government Data and Statistics State and local government agencies also compile and maintain statistical information.

## Defining Rural Population

HCUP Fast Stats presents statistics using data from HCUP's National Nationwide Inpatient Sample NIS , the Nationwide Emergency Department Sample NEDS , the State Inpatient Databases SID , and the State Emergency Department Databases SEDD. Similarly, the poor and the elderly receive extensive and costly non-cash benefits from the government.

## List of Reports and Publications

In stage 1, the bottom quintile was shown to have 3. If these benefits were properly included in the income count, the income share of the two poorest quintiles would be shown to have risen considerably in the 1960s and to have remained relatively unchanged over the past 30 years. Rural and urban designations are taken from the Rural-Urban Commuting Area Codes, a Census tract-based classification scheme that uses standard Census Bureau definitions in combination with work commuting information to characterize rural and urban status and relationships of the Nation's

Census tracts.

### **Defining Rural Population**

Income variables that were given only at the family or person level were aggregated to the household level. By this uniform measure, the U.

### **The Census' Effect on State and Local Budgeting**

The proportion of stays for other hospitalization types remained relatively stable. This is striking given that government spending is more tightly targeted on the poor and elderly in the U.
