Plasma from lasers can shed light on cosmic rays, solar eruptions

Cecchi - Pestellini San Miniato, 4-6 June 2001 Pag. The instrument consists of: 2 planes of double-side silicon microstrip sensors placed on the top of the instrument direction of particle ; 2 two layers of plastic scintillators trigger and a calorimeter constituted by other 16 scintillators and a layer of LYSO sensors. According to Alfvén and Klein, ambiplasma would naturally form pockets of matter and pockets of antimatter that would expand outwards as annihilation between matter and antimatter occurred in the double layer at the boundaries.

Conference Proceedings Online

Patrini Pavia 13 June 2007 Pag. SJR is a measure of scientific influence of journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations come from It measures the scientific influence of the average article in a journal, it expresses how central to the global scientific discussion an average article of the journal is. Lehnert, took the first steps towards its realization.
