The Pure Theory of Law (Stanford Encyclopedia of Philosophy)

Cannot this be done in exactly the same way with law? Legal rules are posited by recognized institutions and their validity derives from their enacted source.

General theory of law : Korkunov, N. M. (Nikolai Mikhailovich), 1853

The main insight of legal positivism, that the conditions of legal validity are determined by social facts, involves two separate claims which have been labeled The Social Thesis and The Separation Thesis. In this case it will not be meaningless to say that this relationship in one or another instance gives its form to another social relationship, or even to the totality of social relationships.

General theory of law (eBook, 1922) [vivchar.tom.ru]

These chips will imitate the properties of the FUELS. Davydov c The concept of biological excitations of H. Why limit ourselves to asking questions about concepts if law can be studied directly? They base their arguments on the fact that there was neither law nor state in primitive society for there was no private property.

General Theory of Norms

Likewise, it is natural for bourgeois jurists to deduce the universality of the legal form from the external and absolute qualities of human nature, or from the fact that the orders of the authorities may extend to any subject. So it turns out that normativity contra Kant always consists of conditional imperatives: if, and only if, one endorses a certain normative point of view, determined by its basic norm, then the norms that follow from it are reason giving, so to speak.
