... > **Desert Harvest**

Scab: Potato scab causes ugly lesions on the tubers. Prevention is the best treatment, but if you have apple borers there are a few things you can do: — Take a wire I recommend a wire coat hanger and poke into the hole that the borer made and try to puncture the larvae. Early June is spent in the kitchen making peach and plum jams.

## Harvest Season in the Desert

Plan With the Desert Seasons While most of the rest of the country plants in the spring and harvests in the autumn, desert growing is a little different.

... > **Desert Harvest**

More eyes will result in more potatoes but smaller size of potatoes. Signs of borers are small holes toward the bottom 2 feet of the trunk.

## RV Camping in California Desert

We look forward to ongoing and new collaborations for Sonoran Desert deliciousness! And it is no wonder.

## Super

The museum and buildings provide insight into the historic and natural history of the area, while the farm itself provides visitors with a variety of new foods to sample and even some to bring home. Do not plant close to tomatoes and other Solanaceae family plants, as diseases could be passed between them.
