Thoracic surgery

A breathing tube called a ventilator keeps the other lung working. Is it normal to feel tired after surgery? Sometimes, your doctor may want you to stay in the hospital for another day after your chest tube is removed. We can help you access hundreds of clinical trials across all specialty areas.

Washington DC Thoracic Surgery

Follow the directions for cleaning the machine.

After Your Thoracic Surgery

The more detail you provide, the better we can recognize the doctor or a staff member who went above and beyond for you or your family. Plan your activities for times of the day when you have more energy. The surgeon operates while watching the video from the thoracoscope on high-resolution monitors in the operating room.

Thoracic surgery

Kane, MD, and Robert S.

Thoracotomy: Procedure, Side Effects, and Recovery

For most people, this will be at least 8 to 10 8-ounce glasses of water or other liquids such as juices each day. Cardiothoracic surgeons operate on diseases that occur in the organs inside the chest and in the bony structures and tissues that form the chest cavity. Cardiologists also perform interventions on the arteries in the heart working through puncture wounds in the groin, but they do not perform open surgery.

Thoracic Surgery

To do the exercises, follow the instructions below.

Thoracic Surgery, Conditions Treated

Your doctor and nurse will ask you about your pain often and give you medication as needed.
