

# Watershed management to meet water quality standards and emerging TMDL - proceedings of the 5-9 March 2005 Atlanta Georgia Conference.

**American Society of Agricultural Engineers - Development and Evaluation of TMDL Planning and Assessment Tools and Processes**

Description: -

-

Water quality -- Measurement -- Congresses.  
 Water -- Pollution -- Total maximum daily load -- Congresses.  
 Watershed management -- Congresses. Watershed management to meet water quality standards and emerging TMDL - proceedings of the 5-9 March 2005 Atlanta Georgia Conference.  
 - Watershed management to meet water quality standards and emerging TMDL - proceedings of the 5-9 March 2005 Atlanta Georgia Conference.

Notes: Includes bibliographical references.

**Source Needs Assessment for Iowa Part II: the Cost of Improving Iowa's Water by Silvia Secchi**

So far, little is known on the effect of spatial scale 1:250,000 vs.

**Development and Evaluation of TMDL Planning and Assessment Tools and Processes**

Design and conduct field experiments to determine the optimal utilization of beef feedlot manure and other animal waste products as a resource for crop production. Develop a program of environmental sampling and geographic analysis to identify sources of fecal coliform contamination in the upper Arkansas River basin, and assist in the development of demonstration projects and educational efforts to reduce this contamination.

**Investigating Environmental Issues Related to Agriculture in Southwest Kansas**

SWCS Science to Solutions Conference. In: Coastal Hydrology and Processes Eds.

**Source Needs Assessment for Iowa Part II: the Cost of Improving Iowa's Water by Silvia Secchi**

Optimal placement of conservation practices using genetic algorithm with SWAT. Three new alfalfa experiments were initiated in Garden City; extramural funds were obtained to support these and other ongoing field experiments; and new methods were tested for determining the sources of fecal bacteria entering the Arkansas River between Deerfield and Ford KS.

**Source Needs Assessment for Iowa Part II: the Cost of Improving Iowa's Water by Silvia Secchi**

Application of ArcView soil and water assessment tool AVSWAT model for the Sny Magill Creek Watershed in northeast Iowa.

### **Effects of soil data resolution on SWAT model stream flow and water quality predictions**

Amsterdam, The Netherlands, September 30-October 4, 2002. Preliminary analysis shows good correspondence between these isolates and isolates taken from streams, ponds, and lagoons where one source or another should predominate. Efficient Heat and Mass Transfer Formulations for Oil Shale Retorting.

### **Investigating Environmental Issues Related to Agriculture in Southwest Kansas**

Canadian Journal of Agricultural Economics under review, October 2009. Current modeling approaches limit the inclusion of tools and methods to assess water quality benefits of these narrow zones.

### **Effects of soil data resolution on SWAT model stream flow and water quality predictions**

Proceedings of the XVIth International Conference on Computational Methods in Water Resources.
