## U.S. hotels continue to make strides in energy efficiency

For example, are occupants in the habit of shutting down computers when they leave? Thus, in-room sensors were suspect, and a substantial group of respondents were hesitant to install an electrical demand controller or load shedder for fear of interfering with guest satisfaction. However, vendors have tools available to make this tedious process quicker and easier.

## Hotel Energy Hacks: Improving Operations With Effective Technologies

Many of these savings stemmed from improvements in the lighting fixtures of the guest rooms, parking garages and boiler rooms. LED lighting has also seen an increase between 2014 and 2016 from 77 percent to 90 percent.

## Energy Management Case Study: Riverside Park Hotel and Leisure Club

One of the less expensive measures implemented at the hotel was putting the steam valve for the laundry on a timer, so that there would be no steam leaks through the piping at night. Early on, Fairmont realized that its exceptional historic properties would offer special challenges.

## Energy Management Case Study: Riverside Park Hotel and Leisure Club

Turning off the lights when a room is not occupied is called.
