**NMSU: Los Alamos County Extension Office**

It cures well when cut for hay.

**Oenothera biennis L.**

The locos are essentially stemless, with leaves made up of several leaflets which are usually silky hairy. Some stems remain green throughout the year.

**NMSU: New Mexico Range Plants**

It tends to grow in the moist shade of evergreen forest at elevations from sea level to 5,000 feet. Bluish-green, curing to a light straw yellow.

**Garden Guides**

Pruning roses is best in late March. Forage Value and Management When tufted hairgrass is growing rapidly, livestock relish it.
