**The Homocysteine Revolution: McCully, Kilmer: 9780879839758: vivchar.tom.ru: Books**

Confirmation of the Discovery Following the discovery of a significant new scientific or medical observation and interpretation, a period of questioning inevitably ensues.

**THE HOMOCYSTEINE REVOLUTION: Medicine in the New Millenium, MCGRAW**

I hope Dr McCully reads this. Did the genetic error in the liver enzyme of this child cause changes in other vital processes in the body? If the arteries were normal in the baby, then homocysteine must act indirectly to produce the arterial changes in patients with homocystinuria, 2 as doctors had theorized in 1965.

Many of the children with this disease die from blood clots developing in the brain, heart or kidneys, causing heart attack, stroke or kidney failure in childhood. McCully's findings transforming his story from medical heresy to legitimate medicine.

**The Homocysteine Revolution**

In 1969, heart researcher Kilmer S. Rushing back to the pathology laboratory, I quickly located the report of the baby's autopsy. Medical investigators at Duke University had done such a study in rats 6 several years earlier.

The blocks were melted together because they had been stored for many years in the hot attic of the old Allen Street building, long since demolished. In 1952 Cantoni had discovered adenosyl methionine, an important trace substance that is required for protein formation and other chemical reactions in the body. They also concluded that her uncle, the eight-year-old boy who mysteriously died of a stroke in 1933, must also have had homocystinuria.

## **HOMOCYSTEINE**

What are the implications for treatment of patients with heart attack, stroke, kidney failure or gangrene by the medical profession? According to Mark Nehler, M.

### **The homocysteine revolution : medicine for the new millennium**

However, there was doubt that the vascular disease was indeed identical with arteriosclerosis as it is seen in the general population. At about this time, I was asked to describe the pathological findings in an interesting case at a clinical pathology conference.

Some of these factors are aging, the male gender, postmenopausal status in women, familial predisposition, smoking and other toxins, lack of exercise, high blood pressure and thyroid disease. I was so excited by this medical discovery that I had difficulty sleeping for almost two weeks. McCully's personal story and scientific philosophy with a fascinating exposition of his discovery and a special program to make use of this information to improve overall health.
