Glass databases

Handbook of Glass Data by O. There is a glass in the SAINT-GOBAIN GLASS range to meet virtually any safety and security needs.

Glass databases

Significant investment in training, technology, equipment, business resources, infrastructure, and quality control systems ensure that all processes - including cutting, edging, laminating, toughening, double glazing, curving, coating, profiling and painting - are to world best standards. Apprentices receive more pay as they gain experience.

HANDBOOK OF GLASS PROPERTIES

Other clamping methods are detailed in BS 6180.

Architects' Data

The glass in barriers with should withstand the appropriate infill infill panels should be designed to design loads relating to the building resist the design infill loads that are occupancy and also conform to the safety appropriate to building occupancy, glazing requirements of BS 6262 Part 4.
