Prof. Hugh S. Torrens

Cement was replaced with durian pectin and RHA by weight at 10%, 15% and 20%. Punching shear strength and development of crack within critical perimeter are observed during experimental test. The growing amount of waste tires has raised ever-increasing environmental concern with the development of the automobile industries.

Prof. Virginia A. Teodosio, Ph.D.

French translation, 1980 published by Historical Society of New Caledonia as Le Temoignage de Ta'unga.

IOP Conference Series: Earth and Environmental Science, Volume 476, 2020

Reprint 1978 in Yagl Ambu, University of PNG. The retrieved questionnaire was then filled into the multi criteria decision making tools and findings showed that the most important priorities base on expert opinion were use of recyclable material at design stage, use of innovative material during manufacturing and maximize the use of local skills.

Prof. Hugh S. Torrens

The needs and concerns of the local people serve as the basis for an alternative committed adult education program. As Graphics Editor for the magazine most of these letters are concerned with article lay-outs and illustrations as well as assessments of potential of various articles for use of graphics.

Prof. Virginia A. Teodosio, Ph.D.

West Indian Journal of Engineering.

Guide to the ILGWU. Carl Proper papers

The central influence in dealing with structural problems of poverty is a recurring theme of self-help, cooperation, network and consensus building. It was moved to Cornhill on the Cheddleton road in 1806 when a public hall was built on its site.

Natural fibres: An opportunity for job creation and improving livelihoods

Trinidad and Tobago and TRUSCA, V.

Prof. Hugh S. Torrens

It is both the result and premise in the restructuring of civil society- state relations. The Field was used as a registration centre for those enlisting during the First World War and later became a social club called Leek National Reserve Club.
